DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 2, 4-6, 14, 15, 17-19, 27, 28, and 30-32 are rejected under 35 U.S.C. 102(e) as being anticipated by Bos et al'471.

For independent claim 1, see sensor 112, lens 114, and electro-optic variable aperture 118 of Bos et al'471.

For independent claim 27, see sensor 112, and electro-optic variable aperture 118 of Bos et al'471.

For independent claim 14, see Figs. 6 and 7, and the accompanying texts.

For claims 2, 15, and 28, see surface confined medium of Figs. 3, 6 and 7.

For claims 4-6, 17-19, and 30-32, see column 10, lines 32-48.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 14-26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: ***

The recitation of claim 14 is incomplete in that an essential element as to the sensor is not included in the body of the claim, since the preamble has called for an optical sensor system.

Claims 15-26, depending from claim 14, inherit the indefiniteness thereof.

Allowable Subject Matter

Claims 3, 7-13, 29 and 33-39 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
